Email: qha258@gmail.com

EDUCATION

- M.Eng.** University of Technology, VNUHCM Mar 2021 – Nov 2022
- **Major:** Control Engineering & Automation (*Research Program*)
 - **GPA:** 8.85/10.0
 - **Thesis:** Simultaneous Localization and Mapping based on Camera-LiDAR Fusion in Riverine Environments (*defended with 9.3/10.0*)
- B.Eng.** University of Technology, VNUHCM Sep 2016 – Nov 2020
- **Major:** Control Engineering & Automation (*Honors Program*)
 - **GPA:** 8.42/10.0
 - **Thesis:** Constructing Map and Collision-Free Path for Autonomous Vehicles (*defended with 9.58/10.0*)

EXPERIENCE

- Software Engineer** Oct 2022 – present
VinAI
- Contribute to the development of Driver Monitoring System (DMS) on numerous electric vehicles.
- Graduate Research Assistant** Oct 2020 – June 2022
VIAM Lab, University of Technology, VNUHCM
- Develop a direct SLAM based on camera-LiDAR fusion.
 - Build a ROS2-based version of VIAM-USV-VC autopilot software suite.
 - Build a ROS-based autopilot software suite, namely VIAM-USV-VC, for VIAM-USV2000 surface vessel.
 - Simulate some autonomous capabilities for surface vessel on Gazebo.
 - Build a customized version of QGroundControl ground control station, namely VIAM-USV-GC, for VIAM-USV2000 surface vessel.
- Research Assistant** Jul 2018 – Oct 2020
VIAM Lab, University of Technology, VNUHCM
- Develop an online, graph-based LiDAR SLAM.
 - Build a Qt-based GUI to remotely command and monitor Delivery AGV.
 - Build a ROS-based autopilot software suite for Delivery AGV.

PROJECTS

Design and Control a Delivery AGV Sep 2019 – Sep 2020

2019 Scientific Research for Student, funded by Faculty of Electrical & Electronics Engineering, University of Technology, VNUHCM

- **Role:** I was responsible for building the autopilot software suite on embedded computer, implementing guidance and control laws, designing monitor GUI on laptop.
- **Description:** We aim to make local delivery faster and cheaper without human intervention by designing an automated guided vehicle. Our team managed to design the electrical components of Delivery AGV, build ordering mobile application for buyers and monitor GUI for shop-owners, as well as automate the vehicle's journey.
- **Result:** Our project earned an acceptance certificate at the end of the program.

SKILLS

Maths: Linear Algebra, Probability, Differential Equation, Vector Calculus, Calculus of Variations, Fourier Analysis, Numerical Analysis, Complex Analysis, Differential Geometry.

Language: C/ C++, MATLAB, Python.

Framework: ROS, ROS2, Gazebo, MATLAB/Simulink, Qt.
